## Further benefits at a glance:

- Minimise the risk of undiscovered foreign particles in food
- Increased protection against contamination, personal injury and consequential costs
- Materials used are suitable and therefore harmless in accordance with Food Ordinance
- Striking blue colour for easy visual detection
- The tests to validate DetectoGrip and Detecto Steel plastic particles were carried out under different conditions and reliably detected. We cannot give a guarantee that 100% of the particles will be detected due to the wide variety of detection conditions
- The metal detector system used should be calibrated carefully and in accordance with the manufacturer's instructions
- Important distinguishing features for foreign particles are as follows:
  - Size
  - Direction and speed of the foreign particle
  - Food or product type
  - Type of metal in the contaminated product
  - Packaging
  - Density
  - Metal detector system (setting, sensitivity, age)
