DICKORON *hygienic*

Everyone working with a **DICKORON** proves to be a professional. The **DICKORON** is number one worldwide among professional users. Our hygienic steels with a stainless steel blade withstand intensive cleaners and cleaning procedures, whereas standard steels tend to easily corrode.

The special sapphire cut of the classic **DICKORON** facilitates a velvet soft sharpening. Thanks to reduced knife consumption the edge retention of a perfectly ground knife is extended without roughening the edge.

DICK *hygienic* Prod.-No. 7 5973 30  30 cm = 12"

Oval shaped blade for extensive contact to the blade and high efficiency.

DICK *hygienic* Prod.-No. 7 5971 30  30 cm = 12"

Round shaped blade, therefore, less weight and reduced arm fatigue.

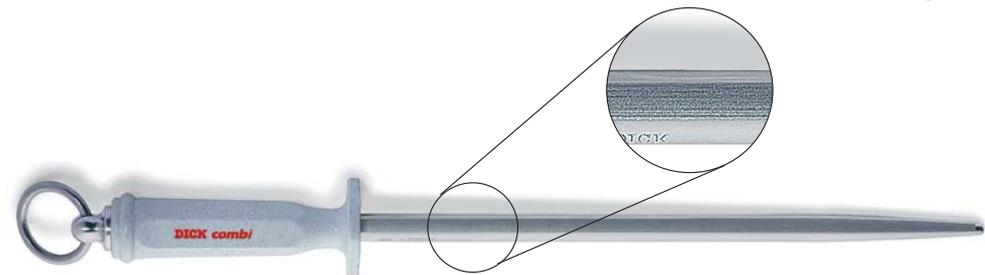

DICK *combi hygienic* Prod.-No. 7 5961 30  30 cm = 12"

Round shaped blade with two different cuts.

Sharpening and polishing with one steel: First sharpening of the edge on two sapphire cut sides and afterwards straightening the edge on the two polished sides.

The ideal steel for all specialists who prefer to work with **one** single steel.

DICK *titan* Prod.-No. 7 9103 30  30 cm = 12"

The coarse steel with high abrasive effect.

Refined blade with wear-resistant, superhard special coating. In combination with the **sapphire cut** you obtain a sharp knife with a fine edge.
